See clearly. Decide confidently.

Give leadership an independent view of your situation and an IT roadmap aligned with your ambitions.

01 **IT audit & governance**

Assess the maturity of controls, risks and the organisation of your information systems.

POTENTIAL DELIVERABLES

Risk and control mapping, documented findings and a prioritised action plan.

02 **IT project review**

Take an independent look before major decisions and critical delivery milestones.

POTENTIAL DELIVERABLES

A governance assessment, dependency analysis and recommendations for upcoming decisions.

03 **Digital transformation & IT strategy**

Connect business strategy to a target IT landscape and a coherent project portfolio.

POTENTIAL DELIVERABLES

An assessment, target-state guidelines and a roadmap with priorities and milestones.

The final scope, timeline and deliverables are agreed after an initial scoping discussion.

Understand exposure. Strengthen control.

Prioritise security efforts and turn recommendations into actions tailored to your environments.

01 Cybersecurity assessment

Identify organisational and technical weaknesses and prioritise risk scenarios.

POTENTIAL DELIVERABLES

A security baseline, gap analysis and a prioritised remediation roadmap.

02 Penetration testing

Test your defences against attack scenarios within an authorised and controlled scope.

POTENTIAL DELIVERABLES

A vulnerability report, severity assessment and technical remediation recommendations.

03 Hardening & IT administration

Reduce your attack surface and structure day-to-day administration practices.

POTENTIAL DELIVERABLES

Configuration standards, an implementation plan and operational documentation.

The final scope, timeline and deliverables are agreed after an initial scoping discussion.

From your challenge to action.

01

Define

Understand your business, constraints and the decisions the engagement should inform.

02

Analyse

Examine practices, systems and the evidence available.

03

Prioritise

Assess risks and organise recommendations according to impact and feasibility.

04

Present

Share a clear summary and a practical direction with your teams.

References selected by engagement: ISO/IEC 27001, NIST CSF, NIST SP 800-53, EBIOS Risk Manager, COBIT, CIS Controls.

Using these frameworks does not imply a claim of certification.

Your next challenge deserves a clear direction.

Request an initial 30-minute conversation.

Preferred time in GMT (UTC+0), subject to email confirmation.
